

Django-SCMS API Endpoints Documentation

This document lists all the available API endpoints in the Django-SCMS project, including HTTP methods, paths, and purposes.

1. Users Module (`api/users/`)

Method	Path	Purpose
POST	<code>/api/users/login/</code>	Obtain JWT token (login)
GET	<code>/api/users/profile/</code>	Get current logged-in user profile
GET	<code>/api/users/users/</code>	List all users
GET	<code>/api/users/users/<int:pk>/</code>	Retrieve a specific user
POST	<code>/api/users/teachers/</code>	Create a teacher
GET	<code>/api/users/teachers/</code>	List teachers
POST	<code>/api/users/teachers/bulk-upload/</code>	Bulk upload teachers
GET / PUT / DELETE	<code>/api/users/teachers/<int:pk>/</code>	Manage specific teacher
POST	<code>/api/users/accountants/</code>	Create an accountant
GET	<code>/api/users/accountants/</code>	List accountants
GET / PUT / DELETE	<code>/api/users/accountants/<int:pk>/</code>	Manage specific accountant
POST	<code>/api/users/parents/</code>	Create a parent
GET	<code>/api/users/parents/</code>	List parents
GET / PUT / DELETE	<code>/api/users/parents/<int:pk>/</code>	Manage specific parent

2. Attendance Module (`api/attendance/`)

Method	Path	Purpose
GET / POST	<code>/api/attendance/teacher-attendance/</code>	List or create teacher attendance
GET / PUT / DELETE	<code>/api/attendance/teacher-attendance/<int:pk>/</code>	Manage specific teacher attendance

Method	Path	Purpose
GET / POST	/api/attendance/student-attendance/	List or create student attendance
GET / PUT / DELETE	/api/attendance/student-attendance/<int:pk>/	Manage specific student attendance
GET / POST	/api/attendance/period-attendance/	List or create period attendance
GET / PUT / DELETE	/api/attendance/period-attendance/<int:pk>/	Manage specific period attendance

3. Academic Module (api/academic/)

- /api/academic/classes/ → Manage classes (CRUD)
- /api/academic/subjects/ → Manage subjects (CRUD)
- /api/academic/years/ → Manage academic years (CRUD)

4. Administration Module (api/administration/)

- /api/administration/staff/ → CRUD staff members
- /api/administration/departments/ → CRUD departments

5. Finance Module (api/finance/)

Method	Path	Purpose
GET / POST	/api/finance/receipts/	List/create receipts
GET / POST	/api/finance/payments/	List/create payments
GET	/api/finance/reports/	Generate financial reports

6. Schedule / Timetable Module (api/timetable/)

Method	Path	Purpose
GET / POST	/api/timetable/	List/create timetable entries
GET / PUT / DELETE	/api/timetable/<int:pk>/	Manage specific timetable entry

7. SIS Module (`api/sis/`)

- `/api/sis/students/` → CRUD students
 - `/api/sis/guardians/` → CRUD parents/guardians
 - `/api/sis/classes/` → Class assignments
-

8. Other Modules

- Assignments: `/api/assignments/`
 - Blog: `/api/blog/`
 - Notes (optional): `/api/notes/` (if enabled)
-

Notes

1. Most endpoints require **JWT authentication** obtained via `/api/users/login/`.
2. Admin panel is accessible at `/admin/`.
3. Only `index.html` and Django admin provide UI; other endpoints are API-only.
4. Use tools like **Postman** or a frontend app to consume APIs.
